

Milestones for Puget Sound Partnership setting of ecosystem recovery targets in Spring 2011

When?	What?
3/23/11	Technical reports to support target setting due from Champions & Interdisciplinary Teams
3/25/11	ECB target setting materials posted
4/1/11	ECB discusses target setting process (workshops, board meetings, etc.) & quick overview of technical materials
4/5/11	Science Panel material on targets posted, including information on interdisciplinary teams' evaluations of indicators for pressure reductions: runoff from built environment, land development, shoreline alteration, and wastewater
4/12/11	Science Panel develops recommendations on indicators for pressure reductions & provides early guidance to authors of target setting materials in advance of April workshops
4/18/11	Advance content for Leadership Council 4/28 discussion of target setting posted
4/18/11	Workshop a on implementer & stakeholder perspectives on target setting re: pollution
4/19/11	Workshop b on implementer & stakeholder perspectives on target setting re: marine/nearshore
4/26/11	Workshop c on implementer stakeholder perspectives on target setting re: watersheds & land development; programmatic indicators
4/28/11 & 4/29/11	Leadership Council previews targets, including selection of specific indicators for which pressure reduction targets will be established
5/3/11	Science Panel material on review of technical foundations for target setting posted
5/10/11 & 5/11/11	Science Panel comments on indicators & targets to guide May workshops and upcoming ECB and Leadership Council discussions
5/12/11	Workshop d on implementer & stakeholder perspectives on target setting: v2 pollution & watersheds
5/13/11	Workshop e on implementer & stakeholder perspectives on target setting: v2 marine/nearshore
5/17/11	ECB target setting materials posted
5/24/11 & 5/25/11	Extra ECB meeting to discuss science, implementer & stakeholder perspectives on targets
6/6/11	Decision packets (1 pg summaries & background materials) for Leadership Council posted
6/9/11	Proposed Leadership Council resolutions on target setting posted
6/16/11 & 6/17/11	Leadership Council adopts targets

3/8/11 – presented to Science Panel

What materials will be available to allow people to engage in Puget Sound Partnership's discussions about target setting?

What?	When?
Briefsheets from indicator champions (n=14) & technical reports from interdisciplinary teams (n=4 which will include information on two Dashboard indicators: shoreline armoring & land use/cover)	3/25/11
Summary of candidate objectives as developed by indicator champions & interdisciplinary teams – ECB materials in advance of April 1 meeting	3/25/11
Summary and evaluation of candidate indicators (beyond Dashboard); draft of conceptual models depicting relationships among Dashboard indicators, key pressures, and management programs – materials in advance of April 12 Science Panel meeting	4/5/11
Briefing memo on status of target development, including Science Panel recommendations about indicators for pressure reductions – in advance of April 28 Leadership Council meeting & available for April workshops	4/15/11
Summary of implementer & stakeholder perspectives heard at April workshops – distributed at Leadership Council meeting	4/28/11
Science panel members' review of technical material to support target setting – compiled reviews distributed in advance of May 10 Science Panel meeting	5/3/11
Summary and evaluation of 4 or more options for each target developed from May 12 and 13 workshops, distributed in advance of newly added May 24 & 25 ECB meeting	5/17/11
Summary and evaluation of 4 or more options for each target, incorporating recommendations and input from ECB meeting, distributed in advance of June 16 LC meeting	6/6/11
Proposed resolutions to adopt targets	6/9/11
Summary of Leadership Council adopted targets and final resolutions	6/20/11
Draft of Action Agenda's "Question 1" including LC adopted targets	Summer 2011
